CONTROL PANELS

# MPA1 Single Door Edge Controller

Honeywell's Smart Edge Single Door Controller MPA1 provides secure Cloud based and Web based access control solutions.

## Overview

Feedback

MPA1 controller enables users to securely and easily deploy their access control system anywhere there's an Ethernet/Internet connection—with no dedicated PC or software costs. This single door POE powered controller is easy to install, operate and maintain, thanks to its unique edge installation design and its dedicated Device Utility App for fast and easy commissioning. It can either be mounted in a US single gang junction box or in a specially designed compact enclosure with Status LED diagnostics. It connects up to two secure OSDP readers, providing enhanced security. MPA1 gives you all the benefits of traditional access control, such as helping you secure doors, manage employee access, and manage sites remotely. It also lets you pull reports easily to meet compliance requirements. With a browser-based interface, your learning curve and training times are significantly decreased. No dedicated software is required — simply log on and you're ready to go, securely — from the office or anywhere. You can manage MPA1 using MAXPRO® Cloud's secure cloud infrastructure or the embedded browser. MPA1 has been developed with a small installer-friendly design that easily adapts to existing IT infrastructure and methods, reducing installation and support costs. So as your system grows, MPA1 grows with you.

**Features & Benefits:**

- Single door edge controller
- Card-to-cloud secure, OSDP
- Mobile App for Installation and Commissioning IOS & Android
- Reduced cabling cost through PoE edge installation
- Flexible install options

**Certifications:**

- OSDP Only. Secure By Nature
